

**Makita**

# 18V Brushless Blower Vacuum

**LXT**

DUB187

**BRUSHLESS**

# Product Statement

The 18V Brushless Blower Vacuum is a lightweight all in one unit which provides excellent blowing performance with a max air speed of 230km/h and max air volume of 6.1m<sup>3</sup>/min in vacuuming.

Switching between Blowing and Vacuuming is made easy with a simple switch lever, no changing of tubes or bags required and the wheels at the base of the tube reduce the weight the user feels in their hand.

Shredder blades mulch up debris before it goes into the bag to maximise the capacity of the 25L bag.

# Product Overview

# Product Specification Sheet

No load speed	0 - 9,000 - 13,500rpm
Max. air volume	Vacuum: 6.1m <sup>3</sup> /min Blower: 4.2m <sup>3</sup> /min
Max. air speed	230km/h
Continuous runtime	14 minutes (BL1860B)
Bag Capacity	25L
Overall length	1,168mm
Skin weight	3.4kg
Weight (with Battery)	4.0kg
Voltage	18V

- **Brushless Motor** – delivers 230km/h max air speed at 13,500rpm
- **Shredder Blades** – sharpened metal blades mulch leaves and twigs that pass through into smaller pieces.
- **25L Capacity** – fabric bag has a zipper to open at the base to empty and single tab to release to remove it from the vacuum.
- **Cruise Control** – throttle can be adjusted with the cruise control lever to maintain constant speed and reduce fatigue of users hands.
- **One Touch Function Change** – quickly change between Blowing and Vacuuming with a simple lever adjustment.
- **Ergonomic Grips** – rubberised handles provide a comfortable grip for long periods of use.
- **Lightweight** – Weighing only 4.0kg with battery reduces fatigue for user.

## Convenience

Simple clip to remove and attach bag for disposal

## Comfort

Dual soft grip handles for comfortable use over long periods

## Ergonomics

Front wheels allow for single hand operation by taking the weight away from the user

## Capacity

Shredder blades optimise capacity of 25L collection bag

## Shredder Blades

Sharpened blades mulch the debris before it passes into the collection bag, optimising the capacity of the bag and reducing the frequency of disposal.

## Cruise Control or Trigger operation

Throttle can be controlled by the trigger or the cruise control lever.

The cruise control lever is ideal for longer periods of use to reduce fatigue on the user by holding the trigger. It also allows the user to adjust the rear hand without stopping the operation.

## Quick Function Change

Simply by switching the control lever position diverts the airflow and changes the function from blower to vacuum.

There is no need to change the pipes or remove the bag so there is no down time between different operations.

## Spare Parts

	<p>GB00000185</p>	<p>Collection Bag</p>
	<p>GB00000198</p>	<p>Shoulder Harness Assembly</p>

## Optional Accessories

	<p>GB00000165</p>	<p>T Shape Vacuum Nozzle</p>
